# Our Firm

FRATER

Fratер Consulting Services is a Melbourne based firm, which since its inception in 2011, has grown quickly to be one of the largest thermal assessment firms, as determined by the Building Designers Associations of Victoria (BDAV).

This growth is off the back of a commitment to the highest levels of service, product knowledge, hard work and understanding of the town planning and construction process. Lead by Director, Jonathon Tavella, the team of professionals varies in expertise's, backgrounds and experience's, which is a virtual tool when servicing its clients.

Fratер Consulting Services has expanded its range of services beyond residential thermal assessments, which it solely produced previously, to now included commercial thermal assessments, waste management assessments, all ESD assessments, daylight modelling, Stormwater assessments and Landscape Plans. This variety was purposefully designed to ensure our involvement from the inception of projects to its completion.

With this range of services, Fratер Consulting Services not only has consolidated its reputation with the BDAV but has ensured it continues to develop its growing reputation with leading building surveying firms and local councils.

It's this work ethos, leadership and growing reputation, which sees Fratер Consulting Services work on fundamental projects that service local communities from commercial, industrial, housing, government and educational projects throughout Victoria and beyond.
